The Alumni Association (Mumbai Branch) of Jadavpur University is organising a national seminar on the theme

India @ 2030 :
DIGITAL REVOLUTION, INDUSTRY DISRUPTION
and FUTURE OF JOBS

Venue : The Lalit , Mumbai International Airport on Saturday, January 12, 2019

Purpose

The Jadavpur University Alumni Association (Mumbai Branch) is organizing a national seminar on the theme '**Digital Revolution, Industry Disruption and the Future of Jobs: India at 2030**' on Saturday, January 12, 2019 at Hotel The Lalit, Mumbai.

Today the world is on the cusp of a digital revolution which is impacting every aspect of our life by changing the way we communicate, the way we commute, the way we shop, the way we transact business, the way we study and the traditional methods of manufacturing. In short, the digital revolution is changing the way we live. Technological advances in the areas such as Block Chain, Artificial Intelligence (AI), Internet of Things (IOT) and Big Data are ushering in the so called Fourth Industrial Revolution. While countries worldwide are making attempts to figure out the ramifications of such a revolution with a view to prepare themselves to face the realities of the next decade, India, estimated to be a USD 10 Trillion economy by the year 2030, needs to fast track on infrastructure and be ready to absorb the new technologies by leap frogging and bringing in the massive transformation as smoothly as possible. It is reasonable to expect that such a multidisciplinary, multifaceted revolution will result in tremendous business opportunities which will benefit the nation. This is accompanied by the lurking fear that the adoption of some of the new technologies may lead to disruption in the existing social structure and industry practices resulting in loss of job opportunities which is a matter of serious concern for the second most populous country of the world. The purpose of the Seminar is to provide a platform for all the stakeholders to interact with domain experts and understand their assessment of the opportunities to be exploited and disruptions to be tackled in India due to the digital revolution and present a broad picture of what the future holds for the country.

Your Support and Our Thoughts

You can become our partner in this endeavor and extend your support in promoting our mission by sponsoring the Seminar through advertisements in our annual publication AANCEB 2019 which will be brought out during the Seminar. This publication will mainly contain articles on the Seminar theme by eminent persons and incidentally highlight the contribution of our association to society along with future commitments and action plan. The sponsorship contract form is attached with this appeal. Kindly return the form, duly signed along with your contribution.

Our eventful history

The Mumbai Branch of the Alumni Association, N.C.E Bengal and Jadavpur University was established in the year 1956 with the short-term objective of providing an umbrella under which Alumni could meet, interact and socialize. Soon after, the objective was enlarged to include contribution to society at large through knowledge sharing and charitable activities. The Association Organized Seminars with the active participation and support of Corporates, on topical themes of national interest and organized cultural events to raise funds for the charitable activities. The Mumbai branch has over 500 active members, who are connected with various core and knowledge based industries, professional organizations and Government agencies in and around Mumbai.

Along with the firm belief in integration and solidarity, our Alumni Association is focused on the spirit of Indian heritage and culture and is committed to the overall welfare of the people of the nation. Professionally, the organization maintains close relationship with eminent academic institutions, reputed industrial houses and organizes workshops, conferences and technical debates on topical
